

This Modell need a nylon film under the five arms from the edge to the center to collect the water. It is under Open Source - for a better world. The right for commercial usage ist just by me "Mohsen Abbasi ([www.mabbasi.de](http://www.mabbasi.de))". Any other unconformed commercial usage is forbidden. Use it around the word and help people to collect rain water with it, or help us to produce and it. When you help people, you help your self and all who you love. Maybe you have enough water, but many many people don't find enough water. Maybe one time you will be one of them. Yes, it is the hard world.- Syria .. it is for you!
