

# FREE Project Snowflake

in the  
labs with  
*Beki*

## Items you will need:

Snowflake.crv File (Version 9)

In the Labs with Beki –  
Christmas Edition –  
Snowflake

10"x10" x 0.75" Ply (Project  
Example) – Snowflake

0.125" End Mill (up & down  
cutter) 60 degree 0.25" vbit

Finishing Materials eg  
Sander, Sandpaper, Saw to  
cut tabs, Silver Spray Paint.

difficulty:  
**EASY**

For Use with:  
**Cut2D/VCarve/Aspire  
V9 or above**

If you plan to cut this project please ensure that you recalculate all toolpaths using settings that are safe and appropriate for your machine, the tools you have and the material you are using.

A simple and quick project to make, a personalised snowflake for the home.

The snowflake project contains text to add a personal touch, you can do the same using the Draw Text Tool. The whole project consists of two toolpaths, VCarving for the text and decoration and a simple profile pass to cut the part out. If you don't have thick material lying around why not cut two snowflakes to glue together like we did in our example for thickness!
