

HKH-professional conference
“Creativity & Technology”

Panel discussion

The North Rhine-Westphalia Wood and Synthetic Materials Professional Association (HKH), in co-operation with the C...Lab, organized the professional conference “Creativity & Technology” in Hamm on the 8th and 9th November 1998. Its theme was: “Electronic media also open new perspectives to the cabinet-maker’s craft.” Topics of the conference were: Interrelation between design and C-technology, digital production - a user’s view, CNC-technology in the cabinet-maker’s workshop,

CAD in contest and training. Further information could be gathered at an accompanying exhibition, where CAD-suppliers, manufacturers of mountings and fittings as well as computer visualization specialists showed their newest products, while the C...Lab presented the projects → “Japanese wood joints ... digital” and → “100% C..NC - prototypes for the immediate production of customized furniture”.

**Exhibition “100% C..NC” in
the machine hall of a former
coal mine**
