Stand at the special show
 “Digital Furniture - 100%
 C..NC” at the Interzum 1997

On the occasion of the Cologne Interzum Fair 1997, the Technology Centre for the Woodprocessing Industry, Lemgo and the C...Lab presented the special show “Digital Furniture - 100% C..NC“. In order to give as clear an idea as possible of the elements of → “Vision of a virtual furniture construction“, which was developed at the C...Lab, the designers at the C...Lab developed a small collection of “virtual furniture“ especially for the Interzum. Together with the companies → CAD+T, EDP-Consulting Stange and the Italian machine manufacturer → Morbidelli, the customization of the virtual furniture, e.g. of the → “Simplizissimus table“ by the customer on the computer screen, as well as its immediate production on a CNC-machining center could be demonstrated.
